

NOMAD
 **YACHTS**

Building on the pedigree of her Nomad 65 sistership, the Nomad 65 SUV takes yacht design to a different level with its extraordinary use of space.

With four double guest cabins, two crew cabins, and many of the luxuries of home, this yacht – as with all in the SUV range – is also highly sustainable and efficient. This includes the option to use the latest solar panel technology to constantly charge during daylight hours, providing enough power to run all the boat's auxiliary.

Light, airy and with interior and exterior spaces designed for complete relaxation while basking in the natural environment, the Nomad 65 SUV provides everything needed for enjoying time on the water.
