

TECNOMAR FOR

Tecnomar and Automobili Lamborghini joined forces to create “Tecnomar for Lamborghini”, a project of strong synergies incorporating the Lamborghini brand values into a unique and cutting-edge motor yacht.

This project, developed entirely by Tecnomar, is inspired by the Lamborghini Sián FKP 37, the hybrid super sports car that anticipates the future, with an unmistakable design and entirely customizable colors and details. The challenge of re-interpreting the common DNA traits of both brands has inspired all phases of the project, from the design philosophy and definition of technical characteristics able to ensure incredible performance, without neglecting the quality of the materials and attention to detail.

The “Tecnomar for Lamborghini 63” motor yacht reaches a speed of 63 knots and will be the fastest yacht in The Italian Sea Group’s Tecnomar fleet, able to meet the needs of both collectors and real sea lovers.
